

VAMSHI SURABHI

Dallas, TX | +1 (913) 326-8594 | vamshi.surabhi@applywizard.ai | [Portfolio](#)

PROFESSIONAL SUMMARY

- Frontend Developer with 5+ years of experience building responsive web applications across banking, consumer technology, and enterprise environments using React.js, Angular, Vue.js, JavaScript, and TypeScript.
- Developed reusable UI components, single-page applications, and REST API integrations that improved page performance by 29%, reduced duplicate code by 24%, and accelerated frontend delivery by 26%.
- Skilled in state management, responsive design, cross-browser compatibility, authentication, frontend testing, and build optimization using Redux, Tailwind CSS, Playwright, Vite, Webpack, npm, and GitHub Actions.
- Collaborated with product managers, UX designers, QA engineers, and business stakeholders to deliver accessible, production-ready interfaces, increasing regression coverage to 86% and reducing UI defects by 28%.

TECHNICAL SKILLS

Frontend Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend Frameworks & Libraries: React.js, Angular, Vue.js 3, Redux, Tailwind CSS

UI Development: Responsive Web Design, Single-Page Applications, Reusable Components, Component-Based Development, State Management, Form Validation, Cross-Browser Compatibility

API Integration & Security: RESTful APIs, JSON, JWT, OAuth 2.0, Authentication, Authorization, Role-Based Access Control

Frontend Testing & Quality: Playwright, End-to-End Testing, Integration Testing, Regression Testing, Test Automation, Debugging, Code Review

Build & Development Tools: npm, Vite, Webpack, Git, GitHub, Bitbucket, GitHub Actions, CI/CD

Development Practices: Frontend Performance Optimization, Secure Coding Practices, Agile, Scrum, SDLC, Sprint Planning, Jira, Confluence

Backend & Databases: Java, Spring Boot, Python, SQL, PostgreSQL, MySQL, SQL Server

PROFESSIONAL EXPERIENCE

Frontend Engineer

Mar 2026 - Present

JP Morgan Chase

- Engineered React.js and TypeScript interfaces for internal banking workflows, simplifying account-servicing tasks and reducing average completion time by 18% across more than 1,200 users.
- Developed reusable UI components and shared form patterns with React, HTML5, and CSS3, cutting duplicate frontend code by 24% across four operational modules.
- Integrated RESTful APIs with JSON, JWT, and OAuth 2.0 authentication, enabling secure data exchange between browser-based applications and backend banking services.
- Optimized frontend rendering, state updates, and API request handling, lowering average page-response time from 2.4 seconds to 1.7 seconds for high-use servicing screens.
- Implemented Redux-based state management for customer, transaction, and workflow data, reducing unnecessary API calls by 21% and improving interface consistency.
- Automated Playwright end-to-end tests for authentication, navigation, form submission, and error handling, increasing critical-path coverage from 68% to 84%.
- Collaborated with product owners, UX designers, QA engineers, and security teams through Jira and Scrum ceremonies, resolving 24 priority UI defects within planned sprints.
- Streamlined frontend builds through npm, Vite, GitHub, and GitHub Actions CI/CD workflows, reducing manual deployment steps by 35% across development and test environments.

Frontend Engineer

Jan 2023 - Feb 2026

Apple Inc.

- Built customer-facing web features using React.js, Vue.js 3, JavaScript, and TypeScript, improving task-completion rates by 14% across high-volume product and support journeys.
- Architected reusable component structures with Tailwind CSS and responsive web design practices, shortening delivery time for new interface screens by 26%.
- Configured Redux state management for product, account, and service interactions, reducing repeated REST API requests by 22% and improving browser responsiveness.
- Designed responsive layouts for desktop, tablet, and mobile experiences using HTML5, CSS3, and mobile-first development, improving cross-device usability across 18 released enhancements.
- Enhanced authentication and protected-route workflows through JWT, OAuth 2.0, and role-based access control, strengthening access consistency across six frontend modules.
- Established Playwright regression suites for sign-in, checkout, navigation, and support scenarios, reducing escaped user-interface defects by 28% across quarterly releases.
- Partnered with UX designers, accessibility reviewers, product managers, and QA teams to refine component behavior and interaction patterns, achieving a 96% sprint acceptance rate.

- Accelerated frontend delivery by tuning Vite, Webpack, and npm build configurations, cutting build duration by 34% and improving developer feedback during feature validation.

Frontend Developer

Oct 2019 - Jul 2021

LTI Mindtree

- Created Angular and JavaScript interfaces for enterprise client applications, reducing average form-completion time by 19% across finance, operations, and support teams.
- Constructed reusable HTML5 and CSS3 components for internal web portals, lowering repetitive UI development effort by 23% across five business workflows.
- Migrated legacy static pages into React.js components, decreasing maintenance effort by 24% while improving responsive behavior and cross-browser compatibility.
- Connected frontend screens with RESTful APIs and JSON payloads, reducing manual data-entry steps by 30% and improving transaction visibility for business users.
- Validated client-side forms, authentication states, and authorization rules using JavaScript and JWT, eliminating 17 interface and access-control defects before release.
- Resolved browser-specific rendering and layout issues through CSS3 debugging and responsive design updates, reducing UI-related support tickets by 27%.
- Coordinated with business analysts, QA engineers, and client stakeholders to translate more than 40 requirements into working frontend features while maintaining 95% on-time sprint delivery.
- Deployed version-controlled frontend builds through npm, Webpack, Git, and Bitbucket, lowering integration issues by 23% and improving release traceability across environments.

PROJECTS

Enterprise Banking Operations Dashboard

- Built a React.js and TypeScript dashboard for account servicing, transaction review, and case tracking, giving operations teams a single interface for daily banking workflows.
- Implemented Redux state management and RESTful API integration to synchronize customer, transaction, and workflow data, reducing repeated requests and improving screen responsiveness by 22%.
- Automated critical user journeys with Playwright for login, search, approvals, and error handling, increasing regression coverage to 86% and lowering release defects by 27%.

Responsive Product Support Portal

- Developed a Vue.js 3 support portal for product lookup, service eligibility, appointment scheduling, and issue tracking, improving customer task completion by 16%.
- Designed reusable responsive components with HTML5, CSS3, and Tailwind CSS, supporting consistent behavior across desktop, tablet, and mobile devices while reducing UI development time by 25%.
- Improved cross-browser compatibility, form validation, and interface accessibility through structured JavaScript and responsive design updates, reducing user-reported UI issues by 24%.

Enterprise Workflow Modernization Application

- Modernized legacy enterprise workflows into an Angular single-page application, simplifying data-entry and approval processes and reducing average task completion time by 20%.
- Secured protected routes and role-based screens through JWT and OAuth 2.0, ensuring controlled access for operations, managers, and support users across six workflow modules.
- Streamlined frontend builds and releases using npm, Webpack, GitHub, and GitHub Actions, cutting manual deployment effort by 32% and improving release consistency across environments.

EDUCATION

Master of Science in Computer Science

Aug 2021 - May 2023

University of Central Missouri | USA

Bachelor of Technology in Electrical and Electronics Engineering

Aug 2017 - Apr 2020

Sri Indu College of Engineering | India
